

Electrical Technician (Hungary)

Established in 2007, Solarpro is one of the leaders players in Central and Eastern Europe in the renewable energy solutions (in the sector of photovoltaics). With over 1 000 employees in 9 countries, we offer wide range of smart energy systems and solutions. With more than 3 GW installed capacity and more than 100 PV plants under operation, we have gained significant experience in the engineering, installation, operation and maintenance of PV systems (on-grid, off-grid and hybrid). We have been trading for over 13 years and take pride in delivering project specific solutions, sustainable results and added value to our clients.

Currently we are looking for an Electrical Systems Technician. The successful candidate should be able to read electrical system design plans, recommend improvements, diagnose faulty equipment, participate in the activity of servicing the elements of their warranty and post-warranty maintenance.

> MAIN RESPONSIBILITIES

- Participate in assembling, testing, and maintaining electrical or electronic wiring and equipment;
- Reading and interpreting electrical and electronic circuit diagrams and schematics;
- Planning the electrical activates including testing and commissioning of electrical or electronic wiring and equipment;
- Troubleshooting of electrical errors highlighted during the commissioning phase;
- Inspection of electrical equipment;
- Planning of the weekly inspection of the power plant / inverters, inverter rooms, transformers and others;
- Participation in the activity of servicing the elements of the built power plants;
- Participation in the activities of warranty and post-warranty support;
- Participation in the process of replacement and repair of system components within the warranty period from the manufacturer if necessary;
- Carrying out tests and inspections of commercial metering devices;
- Participation in other activities related to the position.

> YOUR PROFILE

- Secondary education, majoring in Electrical Engineering or similar;
- Certificate of qualification group for safety when working on electrical equipment at least III group;
- Good computer literacy and skills for working with Word, Excel, Internet;
- Good communication skills, attention to detail, professional ethics and responsibility.

> WE OFFER

- Work in a multinational company and environment with an innovative approach and plenty of challenging assignments;
- Competitive remuneration package;
- Being part of a team of professionals;
- Opportunity to develop your professional skills and personal characteristics.
