

Battery Energy Storage Systems (BESS) Technical Manager

GLOBAL PROVIDER OF **INNOVATIVE PV SOLUTIONS**

Established in 2007, Solarpro is one of the leading players in Central and Eastern Europe in the renewable energy solutions (photovoltaics sector). With over 1 000 employees in 9 countries, we offer wide range of smart energy systems and solutions. With more than 6 GWp installed capacity and more than 100 PV plants under operation, we have gained significant experience in engineering, installation, operation and maintenance of PV systems (on-grid, off-grid and hybrid). We have been trading for over 14 years and take pride in delivering project specific solutions, sustainable results and added value to our clients.

Currently we are looking for a **Battery Energy Storage Systems (BESS) Technical Manager**. As a team leader, you will work directly with clients to ensure deliverables fall within the applicable scope and budget. You will be working closely with other team members to ensure that all project requirements, deadlines, and schedules are on track.

> MAIN RESPONSIBILITIES:

- Customer relationship: Lead the bidding process of battery energy storage projects identifying and proposing the most appropriate technical solution;
- Technical Leadership: Provide technical expertise and guidance on battery energy storage system (BESS) design, integration, and optimization. Stay well informed and trained of industry trends, emerging technologies, and best practices related to energy storage;
- Project Planning and Execution: Lead the technical aspects of energy storage projects from conception to completion. Collaborate with engineering teams to design and develop energy storage systems that meet project objectives and comply with relevant regulations;
- Technical Documentation: Prepare and review technical documentation, including specifications, engineering drawings, and system manuals. Maintain accurate records of design decisions and project and system modifications and optimizations;
- Team Development: Mentor and support technical staff working on energy storage projects. Foster a culture of innovation, collaboration, and continuous learning within the technical team;
- Coordinate with cross-discipline team members and clients to ensure that all parties are on track with project requirements, deadlines, and schedules;
- Managing customer satisfaction within the project;
- Obtaining customer acceptance of project deliverables;
- Conducting post-project evaluation and identifying successful and unsuccessful project elements.

> REQUIREMENTS:

- Bachelors or Master's degree or equivalent in electrical engineering;
- Understanding of energy storage products and a strong technical aptitude;
- Experience as a construction project manager or field services manager is helpful;
- Experience overseeing a design, construction, and implementation project;
- Ability to manage project budget, schedules and timelines;
- Experience establishing and maintaining key performance indicators.

> WE OFFER:

- Development in a multinational company operating in several EU countries;
- Opportunity to gain knowledge in highly developing sector in the field of green energy and environment friendly solutions;
- Excellent working conditions including opportunities for home office, social benefits, etc.;
- Be part of a team of professionals, knowledge leaders in PV sector in Eastern Europe.
