

## Quality Technical Control Manager (Operation & Maintenance)

GLOBAL PROVIDER OF **INNOVATIVE PV SOLUTIONS**

Established in 2007, Solarpro is one of the leading players in Central and Eastern Europe in the renewable energy solutions (photovoltaics sector). With over 1 000 employees in 9 countries, we offer wide range of smart energy systems and solutions. With more than 6 GWp installed capacity and more than 100 PV plants under operation, we have gained significant experience in engineering, installation, operation and maintenance of PV systems (on-grid, off-grid and hybrid). We have been trading for over 14 years and take pride in delivering project specific solutions, sustainable results and added value to our clients.

We are currently looking for a **Quality Technical Control Manager (Operation and Maintenance)**.

As a Quality Technical Control Manager (Operation and Maintenance) is will also be responsible for monitoring the quality assurance process, developing and auditing processes, evaluating customer feedback and taking corrective action and to ensuring that the organization meets all applicable regulatory requirements.

### ➤ MAIN RESPONSIBILITIES:

- Quality Audits: Conduct random PV plants visits and audits to assess the efficiency and effectiveness of operation and maintenance practices. Identify areas for improvement and work with relevant teams to implement necessary changes;
- KPI Compliance Monitoring: Ensure that all operation and maintenance activities comply with relevant industry standards, regulations, and internal policies, measure performance and identify trends or issues;
- Implementation of quality control procedure: Develop and implement quality control procedures, guidelines, and policies to ensure consistent and reliable operation and maintenance processes;
- Training and Development: Collaborate with the training department to develop and deliver technical training programs to enhance the skills and knowledge of operation and maintenance teams;
- Maintain accurate and up-to-date documentation related to quality control activities, including reports, audits, and improvement plans;
- Ensure that all operation and maintenance activities adhere to safety guidelines and regulations, with a strong focus on promoting a safe working environment. Collaborate with HES department to ensure the quality control processes.

### ➤ REQUIREMENTS:

- Master's degree in Engineering;
- Proven experience in quality control, preferably in the operation and maintenance domain;
- Strong knowledge of industry standards, regulations, and best practices in the operation and maintenance field;
- Analytical mindset with the ability to interpret data and make data-driven decisions;
- Excellent communication and interpersonal skills to collaborate with various stakeholders effectively;
- Level B2 English language written and spoken.

### ➤ WE OFFER:

- Development in a multinational company operating in several EU countries;
- Opportunity to gain knowledge in highly developing sector in the field of green energy and environment friendly solutions;
- Excellent working conditions including opportunities for home office, social benefits, etc.;
- Be part of a team of professionals, knowledge leaders in PV sector in Eastern Europe
