

Senior Quality Expert

**GLOBAL PROVIDER OF INNOVATIVE PV SOLUTIONS**

Established in 2007, Solarpro is one of the leading players in Central and Eastern Europe in the renewable energy solutions (photovoltaics sector). With over 1 000 employees in 9 countries, we offer wide range of smart energy systems and solutions. With more than 7 GWp installed capacity and more than 100 PV plants under operation, we have gained significant experience in engineering, installation, operation and maintenance of PV systems (on-grid, off-grid and hybrid). We have been trading for over 14 years and take pride in delivering project specific solutions, sustainable results and added value to our clients.

We are looking for a Senior Quality Expert to handle the quality process, program and assurance from the EPC level for the PV projects in Europe.

> MAIN RESPONSIBILITIES:

- Review bidding documents, in particular Quality set and requirements from the client;
- Develops, proposes, implements and controls plans, programs, policies, processes, systems and procedures to achieve the goals, tasks and work standards;
- Defines criteria for activity reporting and measurement;
- Identifies and assesses risks in the company;
- Participate in meeting with client for review and acceptance of the quality plan and documentation;
- Prepares and reviews product or process specifications with an understanding of client's needs and requirements to develop effective quality control processes;
- Determined the requirements for raw materials or intermediate products for suppliers and ensures their compliance;
- Assists in the preparation of general and project-specific reports on methods and risk assessments;
- Reviews and approves contractor and subcontractor quality documentation to ensure planned activities meet contractual requirements;
- Review third-party inspection reports and ensure items are per the executed contract and design specifications.
- Ensure the EPC, subcontractors, and vendors are following current ESG processes as approved by Owner and EPC, including checklist sign-offs, issue identification, remediation, and associated verifications;
- Performs monitoring and auditing of the quality control functions/activities of a given project or its parts, including schedules for quality inspections, preparation of quality documents and completion of the project file;
- Develops and conducts quality control training programs.

> YOUR PROFILE

- Bachelor's degree in engineering or economical studies
- 3+ years' experience in construction site of PV power plant with Quality functions is a MUST;
- 3+ years' experience in Quality for EPC lever of PV or consultant company for the Investor in PV projects is a MUST;
- Experience in/or working with energy project consultant (e.g. Fichtner, TÜV, DNV GL, UL, PI Berlin) will be considered as an Advantage;
- Proficient oral and written communication skills in English
- High proficiency in interpersonal skills and self-motivation
- Proficient analytical skills
- Proficient personal computer skills (Microsoft applications, including Word, Outlook, Teams, SharePoint, Excel)
- Ability to prioritize and multi-task, and work under strict deadlines
- Proficiency in writing reports, articles, case studies, or other communications materials.

> WE OFFER

- Development in a multinational company operating in several EU countries;
- Opportunity to gain knowledge in highly developing sector in the field of green energy and environment friendly solutions;
- Excellent working conditions including opportunities for home office, social benefits, etc.;
- Be part of a team of professionals, knowledge leaders in PV sector in Eastern Europe
